PROFILE SUMMARY

Highly accomplished Android Developer with **13+ years** of extensive experience in Android **mobile**, **Android TV**, and **smart watch** application development. Proven expertise in crafting high-performance applications, including video streaming and complex user interfaces, with familiarity in Android AOSP development. Adept at **performance optimization for low-end devices** and implementing robust architectural patterns like **MVVM** and SOLID principles. Passionate about leveraging cutting-edge technologies to drive innovation and enhance development efficiency.

SKILLS

MVVM | Scrum | Kotlin | androidTv | BLE | Java | Jetpack | Firebase | Android Wear | Room | ExoPlayer | GLIDE | Espresso | Unit Testing | AOSP | Compose | SAFe | Eclipse MAT | Algorithms | Design Patterns | Agile | Framework | Datastructures | Retrofit | GIT | SVN | REST | MVI | SOLID | MultiThreading | Perforce | TDD | CI/CD | JUnit

WORK EXPERIENCE

Walmart Global Tech
Bangalore
India

Senior Software Engineer (mobile) — ***August 2021 - Present***

Sam's

Modules: Tires and Battery Centre, Membership, Account

1. Spearheaded the design and development of the "Digital Cakes" feature, the **first production-ready** Jetpack Compose feature in the Sam's Club Android app. This initiative enabled server-driven UI, eliminating the need for app releases for config changes, reducing lines of code by 50%, and boosting performance by 25%. This success drove wider adoption of Compose across other feature modules.
2. Led the discovery, design, and migration of the "Tires and Battery Centre" feature module to a modern tech stack across Android, iOS, Web, and the orchestration layer.
3. Implemented **proactive monitoring** for critical business modules (like Tires, a high-dollar value business) through the creation of monitoring dashboards using **OpenObserve**, **Grafana**, and **Firebase**, ensuring **zero production incidents** during migration

Nagra Vision Pvt LTD **Software Expert (androidTv & mobile)** ***Jun 2017 - August 2021***

Bangalore
India

Clients: Pirelli(TransAM) , SVRA(Sports-car Vintage Racing Association)

TransAM and SVRA are motor racing applications and was developed for iOS and Android.

Trans AM ***SVRA***

Clients: Eutelsat, Jackson, Gibson

1. Led design and development for **Android TV** and mobile teams, contributing to the ION product – a subscription-based streaming service similar to Netflix/Amazon Prime, delivered to leading clients.
2. Developed highly animated UI modules and **video streaming** with encryption for ION.
3. Spearheaded React-Native development for new features, focusing on multi-platform streaming support
4. Acted as **Scrum Master**, ensuring quality and on-time deliverables, and mentored junior team members
5. Contributed to the TIGO sports application, a subscription-based sports streaming and news service, focusing on UI modules and encrypted video streaming
6. Optimized system and code for maintenance, performance, and scalability for applications reaching over 2 million users

Aricent (Capegemini) **Senior Software Engineer** ***Mar 2015 - Jun 2017***

Bangalore India.

1. Contributed to the development of Android Open Source Project (AOSP) applications for the Titan Juxt Pro smartwatch, including Pedometer, Selfie Camera, and Notifications, utilizing BLE communication
2. Contributed to the design and development of key feature modules within the Titan Juxt Pro Android companion mobile application for client Titan, enabling users to customize watch faces, set alarms, control music and camera, and access health data via Intel BLE wearables.
3. Contributed to the development of the Volkswagen smart car app, specifically focusing on the BLE communication module between Android devices and the OBD module.

Titan Juxt Pro ***Volks Wagen***

Cognizant Technology Solutions **Programmer Analyst** ***Jun 2014 - Mar 2015***

Coimbatore,India

Tech Mahindra **Software Engineer** ***Mar 2012 - May 2014***

Pune,India
